# THE NEWEST MUST-HAVE KITCHEN ESSENTIAL: HANDS-FREE FAUCETS

With no handles or buttons, three new touch-free faucets make food prep and clean-up quick and sanitary.

Manufacturer Cinaton also recently introduced a hands-free faucet that allows users to control water volume as well as temperature control via sensors. The K2002 pull-out faucet's five strategically placed infrared sensors provide a full range of touch-free operation, the firm says.

Three user-defined settings are available for personalized convenience, while maximum temperature settings prevent an accidental scalding. With a sleek contemporary look, this faucet comes in polished nickel or brushed nickel and is ADA compliant and WaterSense certified. It comes with a five-year warranty and battery backup for power outages.
