Cinaton Introduces K2002 Intelligent iSense Faucet

6/2/2016

SANTA FE SPRINGS, CALIF.—Cinaton introduces its hands-free K2002 Pull-out Kitchen Faucet. With five strategically placed infrared sensors and 13 functions, the faucet offers a full range of touch-free operations. With no handles or buttons, the faucet makes food prep and cleanup easy and helps create a more sanitary cooking environment. Control the water temperature and flow, even pause, or disable for cleaning the sink area—all without touching the faucet. Three user-defined settings are available for personalized convenience, while maximum temperature settings prevent an accidental scalding.

Designed with practicality in mind it features a dual function pull-out spray head and a swivel spout while also saving users up to 70 percent in water savings. With a sleek contemporary look, the faucet comes in a polished nickel or brushed nickel finish and is constructed of solid brass for durability. A PVD coating creates an easy-to-clean surface which is long-lasting and resistant to corrosion. Designed for a single-hole mount, the faucet is ADA compliant and WaterSense certified and comes with a five-year limited warranty.
