Island Style

AS PREP SPACE AND CONVO PLACE, THE KITCHEN ISLAND TAKES CENTER STAGE.

BY NANCI THEORET

SMART WATER

A trio of user-defined settings and touch-free operation bring convenience to the island and the kitchen sink. **Cinaton's new 2201 iSense** smart faucet allows users to direct water flow and control temperature without a touch. There's also a pull-down sprayer, a swivel spout, automatic shut-off and intermittent water flow for up to 70 percent less water use. A battery backup keeps it running when the lights are out. \$898 at cinaton.com.

BRING ON THE FRESH HERBS

It was only a matter of time before the herb garden was introduced into the well-lit kitchen. **SieMatic's new Pure collection island** features a brushed stainless steel finish, matte quartz countertops and various configurations for storage and display, including a quartz garden. "We have a stainless steel container in the bottom to collect moisture," says Fort Myers designer Dwayne Bergmann, the exclusive SieMatic distributor in Southwest Florida. "This is a great way to have herbs at your fingertips and gives an amazing feel to the kitchen." Starts at about \$45,000 depending on internal components.
